CAREER OBJECTIVE

I am a young enthusiast in the IT field, always eager to explore and learn new things. My motivation stems from the desire to stay up-to-date with the latest technologies and apply them to solve complex problems. I am recognized for my responsibility in approaching projects, my perseverance in overcoming challenges, and my dedication to achieving set goals. I strive to deliver high-quality results, and every opportunity in the IT domain is a path for me to learn and grow professionally.

WORK EXPERIENCE

Python Developer
Discord BOT for sending message to specific user_id/group_id

- Using Selenium built application what can login on your account and send message on 30min. User was used for market place on telegram to post message to sell thing.

PROJECTS

PasswordManagerGUI
-I have created a password manager for personal use. Database will be created automatically if not exist

-Simple Password Manager with GUI and SQLite3.

Social-Network on Flask
-I have created a social network with post , user comments , register , login , 404 not_found , add_post , delete post

-Database was created with SQLAlchemy and WTForms.
- Used datatime library to put datetime when you posted something.
- Post with user_id in profile_id
